Summary

Dynamic and motivated B.Tech Computer Science and IT student with a proven track record of academic excellence, strong leadership, and cross-cultural experience gained during seven years of life in the United States. Interested in statistical analysis, artificial intelligence, programming (Java, Python, C), and database management, with deep involvement in project-based learning, teamwork, and technical communication. Renowned for exceptional communication and people skills, regularly demonstrated through collaborative coursework, leadership in extracurricular activities, and the ability to adapt quickly to multicultural environments and diverse teams. Actively pursuing advanced knowledge in emerging technologies while consistently applying structured learning and analytical abilities to solve complex problems and drive results.

Education

Koneru Lakshmaiah Education Foundation (KLH)

Bachelor of Technology (B. Tech CS&IT)

Hyderabad, India

Focused on software engineering, algorithms, operating systems, databases and web technologies.

Expected Nov 2028

○ Currently pursuing a rigorous undergraduate curriculum focused on software engineering, algorithms, operating systems, databases,

and web technologies.

- Developing strong programming skills in C, C++, Java and Python through coursework, lab assignments, and coding projects.
- Participating in hands-on engineering workshops, laboratory courses, and group projects to apply theoretical concepts to practical challenges.
- Exploring advanced topics in artificial intelligence, cloud computing, and cybersecurity through electives and independent study modules.
- Building effective teamwork and technical communication skills by collaborating on academic presentations and IT solution projects.
- Strengthening problem solving, mathematical reasoning, and data analysis skills as part of ongoing academic progression.

The Gaudium School

Hyderabad, India

International Baccalaureate Diploma Programme

- Completed a comprehensive two-year curriculum that emphasizes academic rigor in six subject groups: Literature, Languages, Sciences, Mathematics, Arts, and Social Sciences.
- Developed advanced critical thinking, analytical reasoning, and research skills through the Theory of Knowledge (TOK) and an independent Extended Essay project.
- Demonstrated global mindset and adaptability by engaging in diverse learning environments and collaborating with peers from multiple cultural backgrounds.
- Honed communication and teamwork skills through Creativity, Activity, and Service (CAS), including community service leadership and interdisciplinary group projects.
- Practiced strong time management and autonomy while balancing academic coursework, extracurricular activities, and service commitments.
- Achieved recognition for academic performance and resilience in challenging, assessment-driven environments.

Skills

Team Collaboration, Leadership, Technical Writing, Coding Languages, Time Management, Critical Thinking, Multitasking, Conflict Resolution, Goal-Setting, Objective-Driven,

Languages

Hindi: First Language

English: Advanced (C1)

Telegu: Elementary (A2)

Certifications

Google AI Essentials Certification

KL Social Internship

Git and GitHub Certification

AI-900 Fundamentals
